

Get The **Jumbo** Advantage  
For Your Sugarcane Loading

**UTTAM**  
**TUSKER**   
CANE LOADER **2000**

### Uttam Tusker - Loads Sugar-cane Anywhere

The Uttam Tusker's greatest advantage is its ability to load sugarcane into a variety of vehicles... from trucks of different sizes to even carts. Its unique high lift style boom helps it position the sugar-cane in the vehicle more effectively and simply. It can further compress the cane - ensuring the maximum payload.

### Uttam Tusker - Loads Cleaner Sugar-cane

The Uttam Tusker's unique boom and grab design helps it pick up cane from above instead of push-piling. The Loader lifts and loads cleaner, rock-free and trash-free sugar-cane. Making it the ideal choice for operations specifically in Indian conditions - rough terrain and field conditions.

### Uttam Tusker - Enhanced Manoeuverability For Enhanced Efficiency

The Uttam Cane Loader's tricycle design gives it a tremendous advantage - the ability to turn within its own length. This makes it ideal for loading operations even in small spaces. It is also very effective in cleaning up spilled cane, or for cleaning up operations in the field or factory, and even feeding cane onto mill carrier.

# Designed For Total Flexibility And Elephantine Performance.

## Uttam Tusker - Performance Even On Steep Slopes.

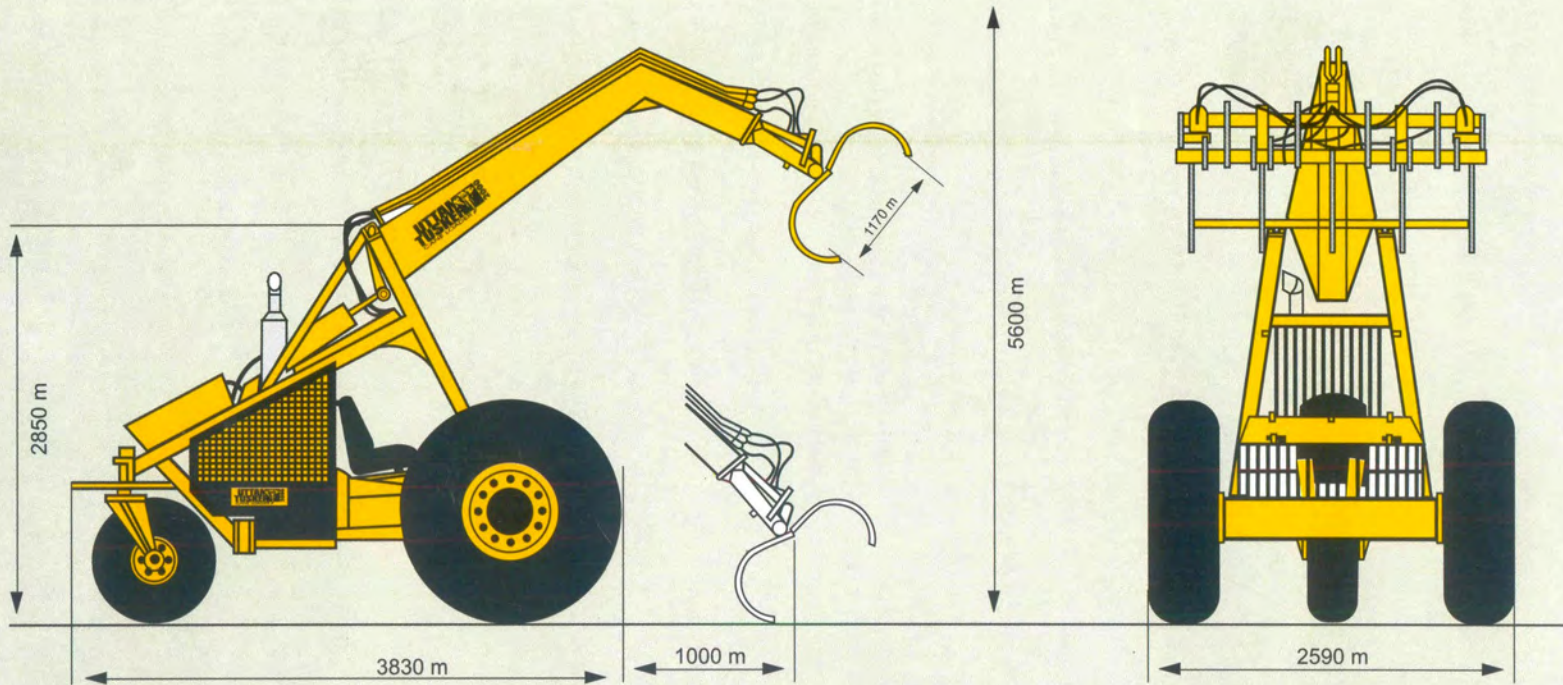

The Cane Loader has been designed with a very low centre of gravity and a unique hydrostatic front wheel drive. These enable the loader to perform even on slopes of upto 45° incline. Making it the ideal choice even in steep rough terrain areas.

## Uttam Tusker - Easy To Operate, Easy To Maintain

Operations of the Cane Loader have been kept simple yet effective. Simple hydrostatic drive via the foot pedals ensures that the operator's hands are left free for operating the boom and grab. This unique rugged drive system does away with expensive alternates like clutch, transmission or propshafts. The result is a rugged, hard working machine that's easy to operate and so easy to maintain.

## Uttam Tusker - Dimensions That Are Ideal For Indian Conditions

- Air cooled engine (Net Power) : 33 KW (45 hp)
- Operating weight (Nett) : 4,200 Kg
- Grab capacity : 0.319 m<sup>2</sup> (495 inch<sup>2</sup>)
